## SPECIFIC COMMENTS TO AUTHORS

Very interesting case. Although the incidence of emphysema around the periorbital areas is high, the solution proved simple but highly effective.

## SPECIFIC COMMENTS TO AUTHORS

This is a good research article for such type of diseases.

**SPECIFIC COMMENTS TO AUTHORS**

The content of the manuscript is good, practical, and has certain guiding significance for clinical work. There are several problems: 1. Relatively simple case and treatment; 2. Whether the informed consent of the patient has been obtained is not described in the paper; 3. It is suggested to Mosaic the pupil and iris ciliary body of the eye in the picture; 4. The format of reference documents is not uniform; 5. Whether it is a single case report is universal or not needs to be verified by more clinical practice, so there should be room for discussion.
