COMMENTS TO AUTHORS

Review on Manuscript No. 10003 The manuscript entitled "Prevalence survey and risk factors analysis of gallstone in Uighur and Han" by Li et al is very well writted. In this manuscript, 9455 patients with complete medical data, were collected. The prevalence and possible risk factors of gallstone in Uighur and Han was evaluated. The results are interesting. Comments 1 Some minor language polishing should be corrected. 2 The discuss section should be more focus on the results. Some data are repeated in results and discuss section. 3 Reference list is updated.
