COMMENTS TO AUTHORS

Review on "Effects of SAHA on proliferation and apoptosis of HCC cells and HBV replication", authors Ying-Chun Wang, Xu Yang, Lan-Hua Xing, Wei-Zong Kong. As we know HCC is one of the most common malignant tumors; and HDACIs are a series of new anticancer drugs with a wide scope of application. In this manuscript, Ying-Chun Wang et al investigated the effects of suberoylanilide hydroxamic acid, a potent HDACI on proliferation and apoptosis of a human hepatocellular carcinoma cell line (HepG2.2.15) and HBV replication. The manuscript is very well written. It's worthy for publication in WJG. 1. The main text (method, result and discussion) is very good. 2. Ref. is updated. 3. The figures and tables are informative, and will provide the reader more information. More clear figure 2 should be provided for print.
