

Dear Jerzy Tadeusz Chudek, MD, George Kontogeorgos, MD, PhD, Ja Hyeon Ku, MD, PhD, Bao-Gan Peng, MD, PhD, & Maurizio Serati, MD,
Editors-in-Chief,
World Journal of Clinical Cases

Thank you for giving me the opportunity to submit a revised draft of my manuscript titled “Recurrent ventricular arrhythmia due to aconite intoxication successfully treated with landiolol: A case report” to the *World Journal of Clinical Cases*. We appreciate the time and effort you and the reviewers have dedicated to providing valuable feedback on my manuscript. We are grateful to the reviewers for their insightful comments on our manuscript. We have incorporated changes to reflect most of the suggestions provided by the reviewers.

删除的内容: We have highlighted the changes within the manuscript.

First reviewer

We are very grateful to the first reviewer for the critical comments and valuable suggestions, which have helped us improve our paper considerably. As indicated in the following responses, we have considered all these comments and suggestions while revising our paper.

Comment #1.

In this case, the patient ingested aconite, not aconitine. So the title should be “Recurrent ventricular arrhythmia due to aconite intoxication successfully treated with landiolol: A case report” and the aconitum alkaloids including aconitine, mesaconitine, hypaconitine et al should be studied and discussed.

Response

Thank you for the valuable comment. As you indicated, we have changed the title to "Recurrent ventricular arrhythmia due to aconite intoxication successfully treated with landiolol: A case report". In addition, the alkaloids of aconite—aconitine, mesaconitine, hypaconitine, and jessaconitine—are difficult to discuss individually; thus, they are collectively discussed via total blood levels.

Comment #2.

“Aconitum alkaloids” should be used ,but not “aconitine alkaloids”.

Response

Thank you for your valuable comment.

We have changed all references to "Aconitine alkaloids" to "Aconitum alkaloids," as you have indicated.

Comment #3.

Fig 2 has much information of time course and treatment , which is not clearly described in the article. And its figure legend is too simple.

Response

Thank you for your valuable comment.

As you have pointed out, we have added the information in Figure 2 to the text under the subsection— “TREATMENT”. We have also revised the figure legend.

Comment #4.

At the admission, the patient had obvious symptoms of gastrointestinal and nervous intoxication. This report should mention what treatment (or no treatment) was carried out to treat such symptoms, and compare the gastrointestinal and nervous symptoms before and after landiolol treatment.

Response

Thank you for your valuable comment.

In the subsection "OUTCOME AND FOLLOW UP", we added that no treatment was administered for gastrointestinal or nervous symptoms and that the symptoms had improved and were asymptomatic after extubation.

Second reviewer

We appreciate your valuable comments. As indicated in the responses below, we have carefully considered all the comments while revising our manuscript.

Comment . English language should be revised.

Response

Thank you for your valuable comment.

We have availed the services of a English editing company to revise the final manuscript.
