Insights into ⁴⁵ human immunodeficiency virus-hepatitis B virus co-infection in India

Runu Chakravarty, Ananya Pal

Abstract

Shared routes of transmission lead to frequent ²³ human immunodeficiency virus (HIV)-hepatitis B virus (HBV) co-infection in a host which results in ⁶⁶ about 10% of HIV positive individuals to have ³ chronic hepatitis B infection worldwide. In post-ART era, liver diseases have emerged as the leading cause of morbidity and mortality in HIV-infected individuals and HBV co-infection have become the major
