Answer to reviewer's comments

Reviewer 00209021:

In the absence of suggestions or corrections, we want to thank the reviewer for the kind words on our manuscript

Reviewer 03475636

- 1) As suggested we have added, in red color, a new paragraph titled: **"Antiphospholipid Syndrome and Systemic Lupus Erythematosus"** including the appropriate references (11 references have been added)
- 2) In the **Introduction**, we now summarize the objectives and rationale of this review, and in the final paragraph titled: **"Conclusions and future directions"** we have provided, as suggested, the limitations of current evidence and indicate which should be the next steps on this topic

Thanks to the reviewers concerns the manuscript has been improved.

Best regards.

Maurizio Salvadori MD
