COMMENTS TO AUTHORS

Dear author It is necessary to correct some errors like this one: this small error: "Serum ADA levels >20 U/L were found in % 64 AIH patients and in % 0 healthy controls, p <0.001".

COMMENTS TO AUTHORS

In this study, the authors aimed to evaluate relationship between serum adenosine deaminase (ADA) levels and histological features in patients with autoimmune hepatitis (AIH). It seems to me a good study, correctly developed with a suitable order. Moreover, it brings an interesting contribution to the knowledge. Comments; ? There are several punctuation errors in the text. (e.g. % 64 AIH patients) ? Remove the statement from Table 4. (Hata! Belgede belirtilen stilde metne rastlanmad?.)
