Robotic total meso-rectal excision for rectal cancer: a systematic review following the publication of the ROLARR trial

Katie Jones, Mohamed G Qassem, Parv Sains, Mirza K Baig, Muhammad S Sajid

Abstract

AIM

To compare outcomes in patients undergoing rectal resection by robotic total meso-rectal excision (RTME) versus laparoscopic total meso-rectal excision (LTME).

METHODS:

Standard medical electronic databases such as pubmed, Medline, Embase and Scopus were searched to find relevant articles. The data retrieved from all types of included published comparative trials in patients undergoing RTME versus LTME
