SPECIFIC COMMENTS TO AUTHORS

Thank you for the opportunity to review the manuscript titled: A fish spike moves from the pharynx to the thyroid: case report. In this case review the authors described a case 70-year-old woman who swallowed a fish spike secondary to recent dentures and presented with foreign body sensation for 20 days. Endoscopy was negative. However, CT neck showed linear dense shadow in the left thyroid lobe that was removed surgically. Overall good work and interesting case for publication. The authors well discussed the case and provided clear recommendations and good images. I have few minor comments. 1. In the discussion section line 79, the authors referred to previous 19 cases. It would be helpful if they could add the reference/references. 2. Few Typos. For example; -Line 40 (Treatment section) his representative --- her representative
