Hepatitis C virus markers in infection by hepatitis C virus (in the era of directly acting antivirals)

Nicola Coppola, Mariantonietta Pisaturo, Rosa Zampino, Margherita Macera, Caterina Sagnelli, Evangelista Sagnelli

Abstract

About 130-170 million people are infected with the hepatitis C virus (HCV) worldwide and more than 350,000 people die each year of HCV-related liver diseases. The combination of pegylated interferon (Peg-IFN) and ribavirin (RBV) was recommended as
