Manuscript Type: MINIREVIEWS

Reviewer 00646537

Interesting and well written review. Would suggest adding a bit more on the process and rationale of Allo-HCST since that is one of the main areas of focus in your article. The abstract reads more like an introduction. Needs a bit of modification. Important points from the studies mentioned could be summarized in a table.

Reviewer 00646502

The article reports an interesting review on the use of stem cell transplantation in the treatment of mycosis fungoides. It is well written and with appropriate and updated references. The language is correct.

Reviewer 00646464

This paper reports a well written review on Mycosis Fungoides treatment. It would be interesting if some important points were put in a Table.

Reviewer 00646460

This is a well-written review article regarding an important topic - the feasibility of stem cell transplantation for the treatment of mycosis fungoides and Sezary syndrome. The report is clinically interesting and relevant. I would suggest using a table format to summarize the recent studies regarding this topic.

Reviewer 02508408

Please see above.

Reviewer 00646519

In general is an interesting paper, i have no comments, just some typos should be corected.

Thank you again for publishing our manuscript in the World Journal of Dermatology.

Sincerely yours,

Pusem Patr
