Scientific significance of the conclusion in this manuscript	[Y] Grade A: Excellent [] Grade B: Good [] Grade C: Fair [] Grade D: No scientific significance
Language quality	[Y] Grade A: Priority publishing [] Grade B: Minor language polishing [] Grade C: A great deal of language polishing [] Grade D: Rejection
Conclusion	[] Accept (High priority) [Y] Accept (General priority) [] Minor revision [] Major revision [] Rejection
Re-review	[]Yes [Y]No
Peer-reviewer statements	Peer-Review: [Y] Anonymous [] Onymous Conflicts-of-Interest: [] Yes [Y] No

SPECIFIC COMMENTS TO AUTHORS

Aneurysms in CNS, heart, retina and lung mimic tumor and biopsy is fatal. My associate son had a biopsy for lung lesion and biopsy lead to his immediate fatality. These events are not reported because of medicolegal issues. High suspicion, angiographic modalities need to be done before any biopsy. The rare case here presented as a mass blocking the bronchus that most would biopsy. The correct approach was followed saving the patient life. It has a high teaching value and is not to be forgotten at all
