

Institutional Animal Care statement

2 May, 2021

To whom it may concern

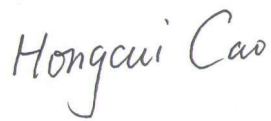

Title of Study: LncRNA SNHG16 promotes human placental-derived mesenchymal stem cells proliferation capacity through PI3K/AKT pathway under hypoxia

Chief investigator: Prof. Hongcui Cao

This letter is to form that this research does not involve animal experiments, so we do not have the approval for animal care. However, all protocols for handling human tissues and cells in this study were approved by the Ethics Committee of The First Affiliated Hospital of Zhejiang University (No. 2020-1088). You can find the document in the "Institutional Review Board Approval Form" part.

Please contact me if you have any queries.

Sincerely,

A handwritten signature in black ink that reads "Hongcui Cao". The signature is written in a cursive, flowing style.
