Name of Journal: World Journal of Gastroenterology

ESPS Manuscript NO: 18569

Manuscript Type: TOPIC HIGHLIGHT

Rapid and quantitative detection for hepatitis B virus

Yue-Ping Liu, Chun-Yan Yao

### Abstract

Despite availability of a universal vaccine, hepatitis B virus (HBV) infection has a huge impact on public health worldwide. Accurate and timely diagnosis of HBV infection is needed. Rapid developments have been made in the diagnostic and monitoring methods for HBV infection, including serological and molecular assays. In clinical practice, qualitative hepatitis B surface antigen (HBsAg) testing has long served as a diagnostic marker for individuals infected with chronic
