Multiplex qPCR for serodetection and serotyping of hepatitis viruses: A Brief review

Mohammad Irshad, Priyanka Gupta, Dhananjay Singh Mankotia, Mohammad Ahmad Ansari

Abstract

Present review describes the current status of multiplex quantitative real time PCR (qPCR) assays developed and used globally for detection and subtyping of hepatitis viruses in body fluids. Several studies reported the use of multiplex qPCR for detection of hepatitis viruses including HAV, HBV, HCV, HDV and HEV. Simultaneously, multiplex qPCR was also developed for
