Dear editor

Journal of world clinical cases

Manuscript NO:47172

Title: Safety and efficacy of transfemoral intrahepatic portosystemic shunt for portal hypertension: A single-center retrospective study

Author: Yu Zhang, Fu-Quan Liu, Zhen-Dong Yue, Hong-Wei Zhao, Lei Wang, Zhen-Hua Fan, Fu-Liang He

First, we would like to say thank you to the reviewers for the useful comments to improve the paper. Improvements have been made based on the suggestion of reviewers.

Responses to the Reviewer #2:

1. Figures 1 and 2 are of poor quality.

We have imported the image into photoshop software and improved its resolution

2. Table 2 needs justification.

Table 2 has been adjusted.

3. In page 9 the sentence , “and a method known as the “gun-sight” approach, which creates a portocaval shunt in patients with HVs unsuitable for conventional TIPS creation was performed.” needs rewriting.

This sentences has been rewritten as “and a method known as the “gun-sight” approach[23], which creates a portocaval shunt in patients with HVs unsuitable for conventional TIPS creation.”

4. In page 8 “THE” should not be with capital letters.

“THE” has been deleted.

5. In Table 1 “0.169” has two points.

This mistake has been corrected.
