Childhood constipation as an emerging public health problem

Rajindrajith S *et al.* Public health impact of childhood constipation

Shaman Rajindrajith, Niranga Manjuri Devanarayana, Bonaventure Jayasiri Crispus

Perera, Marc Alexander Benninga

### Abstract

Functional constipation (FC) is a significant health problem in children and contrary to the common belief, has serious ramifications on lives of children and their families. It is defined by Rome criteria which encourage to use multiple clinical features for diagnosis. FC in children has a high prevalence (0.7%-29%) across the world, both in developed and developing countries. The biopsychosocial risk factors like psychological
