## SPECIFIC COMMENTS TO AUTHORS

The cases are interesting and rare. However the presentation is unfortunately sloppy and unacceptable. The format of the article must be entirely changed. The introduction should contain information about the rarity of the presented pathologies. The cases should be separately and clearly defined along with relevant subtitles and final diagnosis. The discussion should concentrate on two entities with relevant subtitles. The figure legends must be rewritten with much more detail. The diagnosis must be given with the subtitles. The mass and the important organs should be marked. The hypointense character of the mass in the figure 1 should be emphasized. the anatomical position of the images must be given. All of the figure legends must be rewritten by an expert in radiology.

## SPECIFIC COMMENTS TO AUTHORS

To Authors, This study titled “Prenatal ultrasound of fetal CIF and CH: case series” was reviewed. This study is an interesting study dealing with rare cases. However, these three rare cases have not been discussed sufficiently. The discussion needs to be rewritten in accordance with the rules of literary writing and compared with previous works in a more analytical way, emphasizing the similarities and differences. Therefore, some suggestions need to be made to improve the quality of study; Abbreviations should not be used in the title of the study. Abbreviations should be checked again and added to the manuscript as a section. The whole study should be rewritten by a natural speaker. I understood that this study has been written by two different authors. (Line 122)= “The child was given standard medical treatment”. What was the standard medical treatment? The knowledge of detailing therapy should be written in the manuscript. Figures and Figure legends are not understandable. These parts should be rewritten by an expert.
