

April 21, 2016

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 24229-Revised manuscript.docx).

Title: Non-pharmacological intervention for Posterior Cortical Atrophy

Authors: Agnès Weill-Chounlamountry, Jorge Alves, Pascale Pradat-Diehl

Name of Journal: World Journal of Clinical Cases

ESPS Manuscript NO: 24229

First of all, we would like to thank both reviewers for their positive opinions on this manuscript and recommendations which were helpful to improve our manuscript. Revisions have been made, and changes highlighted in yellow.

Reviewer 02446023: "There were several word choices and ways in which the information was presented that needed improvement."

- **Response:** This has been conducted throughout the manuscript as suggested recommendations for word choices.

Reviewer 00503929:

- "Provide more details in the abstract concerning the issues that are actually dealt with in the paper"

Response: We have provided more details in the abstract describing shortly what are non-pharmacological interventions in PCA.

- "How many patients have been studied?"

Response: We have specified that seven patients have been studied.

Thank you again for publishing our invited review manuscript in the World Journal of Clinical Cases.
