**Manuscript Type:** Review

**Role of adipocytes in hypertension**

**Rebecca Martin, Joseph I Shapiro**

#### Abstract

Although it has known for some time that obesity is associated with salt sensitivity and hypertension, recent data suggests that the adipocyte may actually be the proximate cause of this physiological changes. In the following review, the data demonstrating this association as well as the potentially operative pathophysiological mechanisms are reviewed and discussed.

**Key words:** Hypertension, oxidant stress, natriuresis, heme oxygenase, nitric oxide, renal function, obesity.
