Tripartite comparison of single-incision and conventional laparoscopy in cholecystectomy: A multicenter trial

Guo-Lin He, Zi-Sheng Jiang, Yuan Cheng, Qing-Bo Lai, Chen-Jie Zhou, Hai-Yan Liu, Yi Gao, Ming-Xin Pan, Zhi-Xiang Jian

Abstract

AIM: To compare the characteristics of two single-incision methods, and conventional laparoscopy in cholecystectomy, and demonstrate the safety and feasibility.

METHODS: Three hundred patients with gallstones or gallbladder polyps were admitted to two clinical centers from January 2013 to January 2014 and were randomized into three groups of 100: single-incision three-device group, X-Cone group, and conventional group. The operative time,
