**Name of Journal:** *World Journal of Gastrointestinal Oncology*

**Manuscript NO:** 39386

**Manuscript Type:** Systematic Review

**Pancreatic, periampullary and biliary cancer with liver metastases: should we consider resection in selected cases?**

**Rachael Chang Lee, Harsh Kanhere, Markus Trochsler, Vy Broadbridge, Guy Maddern, Timothy Price**

### Abstract

Background: Although hepatic metastasectomy is well established for colorectal and neuroendocrine cancer, its role in other metastatic cancers is less defined. The purpose of this review is to analyse the safety and efficacy of curative intent surgery in biliary and pancreatic cancer.

Methods: An extensive literature review was performed using Medline, google scholar and EMBASE to identify articles regarding hepato-pancreatoduodenectomy
