## COMMENTS TO AUTHORS

This manuscript reviews the recent findings on aberrant DNA methylation in gastric cancer associated with the infection of H. pylori and EBV. It is suggested that the title of this manuscript might be more specific to the association with the infection of H. pylori and EBV. The minor point is that the authors should follow the requirements for this journal to list the references, especially the format.

## COMMENTS TO AUTHORS

The manuscript must be revised by an English speaker. Moreover, more focus is necessary. Several new and well conducted studies are not cited.
