**(1)Reviewer #1:**

**Specific Comments to Authors:** There are a few grammar error such as "more clearer", or exists after a plural name in the discussion section. Also, in the outcome and follow up, the authors state "I did", why was the first person used in this context? Also, give the title of the manuscript I suggest to add a few lines in the discussion section mentioning spleen elastography, which could have helped in the diagnosis of sinistral portal hypertension.

**Answers:** The "more" has been removed, revised to "Compared with other radiological findings, ultrasonographic imaging is clearer to indicate varices if the splenic vein is only partially

thrombosed [15]."

The "more" has been revised to "the patient was followed up, which manifested stable condition, according to what the doctor ordered.

I have added a few lines in the discussion section mentioning spleen elastography, cited these four papers: - Values of spleen stiffness in healthy individuals - PMID: 31054978 DOI: 10.1016/j.aohep.2019.03.004 - Spleen Stiffness and splenoportal dynamics - PMID: 32304009 DOI: 10.1007/s40477-020-00456-9 - Spleen stiffness and portal hypertension - PMID: 31740162 DOI: 10.1016/j.aohep.2019.09.004 - Spleen stiffness can assess the function of spontaneous portosystemic shunts - DOI: <https://doi.org/10.1016/j.aohep.2020.07.004>

I have corrected grammar error as required.
