Postoperative fluid management

Selami Ilgaz Kuyulioğlu, Tolga Dinc, İsa Özcan, Akin Bostunoglu, Mukerrem Cete, Faruk Coskun

Abstract

Postoperative care units are run by an anesthesiologist or a surgeon, or a team formed of both. Management of postoperative fluid therapy should be done considering both patients' status and intraoperative events. Types of the fluids, amount of the fluid given and timing of the administration are the main topics that determine the fluid management strategy. The main goal of fluid resuscitation is to provide adequate tissue perfusion without harming the patient. The endothelial glycocalyx dysfunction and
