SPECIFIC COMMENTS TO AUTHORS

I would like to mention the following comments: 1- Genetic and family history is an important potential confounder that can affect on neuropsychiatric issues after stroke. 2- Age (at stroke) is very important factor which can change neuropsychiatric issues after stroke. 3- Socioeconomic status (SES0, family income, family size, culture, personality and ... all are important factors that can affect on many neuropsychiatric issues after stroke. 4- Depression disorder (PSD), Anxiety (PSA), PTSD and Psychosis and Psychotic disorders after stroke all are multifactorial and were influenced by many factors (such as factors in comment 3). These factors did not addressed in the article. 5- Time to access to health services, quality of care services, insurance type, treatment costs etc. can also affect on the neuropsychiatric issues after stroke. Good Luck

SPECIFIC COMMENTS TO AUTHORS

The topic of the mini-review is appropriate and of general interest. The mini-review is novel and interesting and adds to the knowledge base. Relevance, significance and potential impact of the manuscript is good. The mini-review includes a balanced, comprehensive and critical view of the research area. The presentation is good. Minor remarks: Grammar and style should have minor revision. Avoid repetition. Technical errors in the text of the manuscript. For example, spacing between number and unit, writing references, etc. Add some graphical presentation. For example, Table for each post-stroke disorder, with the ref. summary, number of patients, or other relevant information; or Tables with results of meta-analysis, or else.....
