COMMENTS TO AUTHORS

Many thanks for the opportunity of reviewing the manuscript "Fetal stem cell transplantation: past, present, and future". It is an interesting review, and I have only a couple of comments. It would be appropriate in the section of transplant in 2000 and earlier to only describe the positive results without explaining all the history of them, maybe only to quote the respective reference. Within fetal considerations, it would be interesting to mention the perspective of the future of this procedures, and what about ethics today and tomorrow.
