### SPECIFIC COMMENTS TO AUTHORS

The editorial entitled: Circadian rhythms in the pathogenesis of gastrointestinal diseases, by Codoñer Franch P. and Gombert M. is a well done Editorial, timely and well written. Indeed, I think that to improve the manuscript the authors could add some papers about interplay between microbes and clock in the gut. To this end I suggest to analyze

and add a brief chapter or sentences regarding the topic described in the manuscripts of Murakami M et al. EMBO Report 2016, Tognini P et al. Cell Metabolism 2017 and Tognini et al. Cold Spring Harb. Perspec. Biol. 2017. The discussion of these points will allow the readers to have a complete picture of the interplay between Circadian clock and gastrointestinal diseases.

### SPECIFIC COMMENTS TO AUTHORS

This is a nice, well written editorial acting as a short review on the relevance of circadian rhythms in GI diseases. It is timely, concise and relevant. I have only some minor comments/suggestions: 1. Adding a paragraph on possible therapeutic approaches could be informative (chronotherapy, light exposure, melatonin etc.) 2. Some details on

GI immune modulation by circadian rhythm (including pathways and mediators, in both innate and adaptive immunity) could also add interest (in the IBD section). The review focuses almost entirely in clock genes or epigenetic changes. 3. An illustration or figure could add clarity to the presentation. 4. Mentioning other areas of interest (liver, GI infections, etc.), even if not reviewing them in detail, may also give a sense of "comprehensiveness".
