**High neutrophil-lymphocyte ratio indicates poor prognosis for ACLF after liver transplantation**

Bing-Yi Lin, Lin Zhou, Lei Geng, Zhi-Yun Zheng, Jun-Jun Jia, Jing Zhang, Jia Yao, Shu-Sen Zheng

### Abstract

**AIM:** To investigate the significance of pre-transplant neutrophil-lymphocyte ratio (NLR) in determining the prognosis of liver transplant (LT) recipients with acute-on-chronic liver failure (ACLF).

**METHODS:** Data were collected from the liver transplantation data bank.
