<https://erj.ersjournals.com/content/early/2020/04/20/13993003.01009-2020>

Jan 01, 2020 - The current COVID-19 pandemic, caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) infection, raises important questions as to whether pre-morbid use or continued administration of inhaled corticosteroids (ICS) affects the outcomes of acute respiratory infections due to coronavirus. Many physicians are concerned about whether individuals positive for ...

**Abstract**

The pandemic severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) infection is captivating the attention of scientists worldwide on the search for an effective treatment while also focusing on vaccine development. Several drugs have been used in the management of coronavirus disease 2019 (COVID-19) which has affected many hospitals and health centers worldwide. Statistically significant results are lacking on the effectiveness of the experimented drugs in reducing COVID-19 morbidity or mortality, as there are very few published randomized clinical trials. Despite this, the
