Microbiome and pancreatic cancer: A comprehensive topic review of literature

Natalie Ertz-Archambault, Paul Keim, Daniel Von Hoff

Abstract

The relationship of an imbalanced microbiome to carcinogenesis has gained attention in several malignancies. Among the most controversial is dysbiosis related to pancreatic cancer. The purpose of this article is to review microbiome alterations associated with pancreatic cancer, its potential utility as an early screening biomarker, examine the influence of the microbiome in antitumor therapy and the potential impact of
