COMMENTS TO AUTHORS

This review was written about HP eradication therapy for DLBCL and this showed the strategy about treating DLBCL. These factors were concisely summarized and the structure of this review is clear.

COMMENTS TO AUTHORS

1-In the title and text, H.pylori needs to be Italic. 2- H.pylori-positive, H.pylori-dependent are more appropriate. 3-First paragraph line 9; "entity" could be replaced with a more appropriate word. Also line 10; "Brief duration of antibiotics" is not clear. 4-In third paragraph; - The first 2 lines need editing. - LG MALT(Low grade?), the abbreviate has not been mentioned. - Line 10; What does IE stand for? - The line before the last 2 lines; "an overall higher survival rate than? please check. - Overall survival(OS),OS is not needed. 5-Centrocyte-like is correct. 6 - In the last paragraph(conclusion),number (2) needs editing.

COMMENTS TO AUTHORS

The topic of the manuscript is important and useful. However the manuscript would need stratification. A conclusion summarizing the actual opinion would be necessary, anyway the readers will be lost in the data "storm". The english grammar needs some corrections

COMMENTS TO AUTHORS

The author should structure this paper with an aim, method and results. Also in the case of a narrative review it should be arranged in a more organized form. Otherwise the paper remain a "personal point of view".
