Diagnostic <sup>9</sup> accuracy of transient elastography (FibroScan) in detection of esophageal varices in patients with cirrhosis: A meta-analysis

Ke Pu, Jing-Hong Shi, Qian Tang, Xin-Jie Wang, Kai-Lin Tang, Zhong-Qi Long, Xing-Sheng Hu

## Abstract

### AIM

Using the transient elastography (FibroScan) to measure Liver stiffness (LS) is a promising noninvasive method to diagnose the esophageal varices (EV) in patients with cirrhosis. However, different diagnostic tests were suggested by different studies. We conducted a meta-analysis in attempt to investigate the diagnostic accuracy of FibroScan (FS) compared to
