

Response to reviewer

Reviewer #1:

Scientific Quality: Grade C (Good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Accept (General priority)

Specific Comments to Authors: -Manuscript is well written, still a simple narrative review. - references are not old with many new citations. - The discussion was not deep enough, and some of the content of the discussion section should have appeared as results.

Response to Reviewer

We utilized a systematic methodology in our literature search, as outlined in the PRISMA diagram (Figure 2). Therefore, we are unable to modify the results section to accommodate, further changes in the discussion section. We've added more information to the discussion section to explore the topic further and give a more detailed analysis. You'll find the updated parts highlighted in yellow.
