Retrospective Cohort Study

Scientific Research Process

Statistical analysis

The statistical analysis was performed under supervision of prof G.J. van der Wilt. The additional yield of taking macrobiopsies and performing excision biopsies was analyzed by comparing all biopsies with the definitive excision specimen. The differences in sensitivity between the number of samples taken through the flexible endoscope was tested with the chi square test for trends.

A handwritten signature in blue ink, consisting of several loops and a long horizontal stroke, likely belonging to Guus M.J. Bökkerink.
