

Dear editors and reviewers:

Thank you very much for considering our revised manuscript entitled “**Adult rhabdomyosarcoma combined with acute myeloid leukemia: A case report**” (Manuscript NO: 88309, Case Report) .We appreciate the careful review and constructive comments provided by the reviewers of our manuscript. We have studied the comments carefully and provided answers in a point-by-point manner to each of the reviewers’ questions. We had made corrections which we hope are suitable for publication in *World Journal of Clinical Cases*. Below are our answers for questions raised by the reviewers.

Reviewer #1:**Specific Comments to Authors:**

More information about the treatment is necessary to complete the case report.

Response: Thank you for your advice. However, we apologize that we are unable to provide more information about the treatment, because of the patient's condition is progressing rapidly. While we were preparing for further treatment, the patient experienced sudden cerebral hemorrhage leading to death. These findings also suggest that the diagnosis of secondary leukemia patients is extremely poor. Therefore, clinical physicians should be carefully when patients diagnosis of secondary leukemia and actively handle should be complications. Thank you very much for your comments and suggestions.
