New blood markers detection technology: A leap in the diagnosis of gastric cancer

Maneesh K Beeharry, Wen-Tao Liu, Min Yan, Zheng-Gang Zhu

Abstract

Gastric cancer is still one of malignant tumors with high morbidity and mortality in the world, with a 5-year survival rate of less than 30%. Gastric cancer is often either asymptomatic or causing only nonspecific symptoms in its early stages, whereby when the symptoms manifest, the cancer has usually reached an
