COMMENTS

COMMENTS TO AUTHORS:

The study is very interesting. Liu et al investigated the therapeutic efficacy of oncolytic herpes simplex virus encoding granulocyte-macrophage colony-stimulating factor (HSVGM-CSF) in a mouse model of pancreatic carcinoma and to explore mechanisms that may be involved in an antitumor response. The authors provide the evidence that HSVGM-CSF could inhibit the growth of pancreatic cancer. This manuscript is well written, it can be published after minor revision.

COMMENTS

COMMENTS TO AUTHORS:

I have read with interest the article entitled: Preclinical evaluation of herpes simplex virus armed with granulocyte-macrophage-colony-stimulating-factor in pancreatic carcinoma. The article is well-written, the results are well described and discussion is sound. However the reference list should be updated (add some ref. published between 2011-2012) before accepting it for publication.
