COMMENTS TO AUTHORS

The manuscript briefly summarizes the current difficulties in predicting the correlations between genetic mutations and the severity of inherited metabolic diseases. Although specific solutions were not presented and discussed in detail, the author outlines a number of potential directions that can potentially serve guidance for future research in the field. The manuscript is very well written.

COMMENTS TO AUTHORS

The proposed work is a great idea and author presents an excellent introduction that might be used to motivate studies using the resources identified. The text is well written and the use of these resources in appropriate studies is well justified. The manuscript does not present any application of this idea but as an editorial I think it may well serve to organize and direct research in a useful way.
