**SPECIFIC COMMENTS TO AUTHORS**

Dear author Thank you for the submission of your article to our journal. I’ve just read your paper and found many problems as follows; Major points As you entitled this paper as a pictorial review, you should add figures to the paper about the mucocele, bile duct redundancy, and vanishing bile duct syndrome. You should revise the figures for the readers to understand more easier. Minor points You should full spell the abbreviations such as CT, MRI, and MRCP at their first appearance in the text. What’s the meaning of graft long-term survivals? What’s the meaning of biliary pathology recurrence? Fig.2 An arrow does not point the stent. The main focus of your paper is demonstrating the CT and MRI findings of post-transplantation complications. You, therefore, do not need to show Figs.2c and d. Fig.3 Where is the anastomotic stricture in Fig.3b. Fig.4 Where is the anastomotic stricture. You should clarify the point in the figure. Fig.5 Probably no readers can recognize where the arrowheads indicate. Fig.6 The location of arrowheads are strange. Fig.8 What does the Fig.8a show? What’s the meaning of cranial collection? Fig.9 What’s the meaning of fluid collection? Fig.14 Where are papillary stenosis and an enlarged papilla?
