### COMMENTS TO AUTHORS

The manuscript, entitled "Therapeutics Advances, entitled: Stomatological management of head and neck cancer patients treated with chemotherapy and radiotherapy" is an interesting review article which goes into some level of detail. However, as a whole it is very difficult to identify the target of the manuscript as it is at times vague and includes information not directly related to the key subject. For example, the author should consider omitting the chapter titled "Patients with bone marrow transplant, etc" as it has no direct relationship to the theme "Stomatological management of head and neck cancer patients treated with chemotherapy and radiotherapy". In addition, the manuscript is of little clinical usefulness for researchers. To be of clinical usefulness the paper needs to be written in a more concise and focused format.
