## COMMENTS TO AUTHORS

A good review for understanding diabetes mellitus related with chronic pancreatitis. But need some minor changes. 1. Probably many readers are not familiar with the term "type 3c DM". I consider the author should prepare a table described about the classification of DM (please modify the table in Diabetes Care 26: S5-20, 2003). 2. Page 6, line 31. The author mentioned "A concomittant analysis of ... type 2 and type 3c diabetes mellitus". Do the authors have an idea how to distinguish between type 2 and 3c DM in insulin and C-peptide level? If you have an idea, please show the cut-off line which can distinguish.
