#### **SPECIFIC COMMENTS TO AUTHORS**

The study is interesting and informative. In Abstract the authors must replace the authors provided by the authors reported. What about the interplay between pro-inflammatory cytokines, regulatory cytokine (IL-10) and microbiome? In section :MECHANISMS OF IMMUNE DISORDERS INDUCED BY INTESTINAL FLORA IMBALANCE IN IBD, the authors must add one or two sentences about the involvement of Nitric oxide in IBD ( Soufli et al 2016). The role of probiotics in immunoregulation during IBD must be added ( Toumi et al, 2013; 2014); I suggest a minor revision.
