ESPS PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology

ESPS manuscript NO: 25780

Title: Immunohistochemistry panel segregates molecular types of hepatocellular carcinoma in Brazilian autopsy cases

Reviewer's code: 02841861

Reviewer's country: China

Science editor: Ya-Juan Ma

Date sent for review: 2016-03-23 11:18

Date reviewed: 2016-04-03 10:52

COMMENTS TO AUTHORS

This manuscript is mainly about assessing the immunohistochemical expression of some protein products of genes related to the pathogenesis of HCC. The paper was well written, I just have one question to the authors, Why they chosen these makers? are they enough to classify the different grade of HCC? I suggest the authors add this in the manuscript ,so our readers could get the idea.

COMMENTS TO AUTHORS

Comments for ESPS Manuscript NO 25780 This is a well conducted study; and the experiments are described in detail. There are no major and few minor concerns. Regarding the latter, immunohistochemical markers were divided into two groups in this paper, I wonder what the basis of the author's grouping is. In addition, the format of this manuscript should be revised according to WJG's requirement.
