COMMENTS TO AUTHORS

The goal of the manuscript is to discuss innovative literature highlighting the importance of ILC in the context of infection disease, tissue repair, tolerance of gut microbiota and inflammatory diseases that affect the liver and intestine homeostasis, which is favorable for the researcher and clinician in various fields. The paper could be accepted by minor revision: eg. 1. Fig 1: the green circle must be changed to ILC3; 2. Table 1: Please supplement the Models of Ref [68], [71],[82],[84].

COMMENTS TO AUTHORS

This review covers a topic which is novel because it views the liver as one of the most important sites of defense against microorganism invasion. New concepts are discussed and clearly presented. I have no major concerns on this manuscript. MINOR POINTS - the English style needs some revision - the paragraphing should guide the reader a little more that it does in the present version.
