COMMENTS TO AUTHORS

An adequate bowel preparation is critical for the quality of colonoscopy. I think that this manuscript is properly described bowel preparation in special situation. Detailed discussion regarding the method of bowel preparation (I.e. timing of preparation, split dosing, diet etc) would be more helpful for appropriate preparation though this manuscript did not focused on this subject.

COMMENTS TO AUTHORS

This review comprises the actual literature and use of bowel preparation under those particular conditions is discussed in detail. Nevertheless additional discussion of timing and diet would have provided some helpful extra information.
