When to use a faecal immunochemical test (fit)? Can a fit test help to rule out colorectal cancer?	~
	\
What kind of test can you do for colon cancer?	~

Medicines and food do not interfere with the test. So it tends to be more accurate and have fewer false

Faecal immunochemical test-based colorectal cancer ...

https://pubmed.ncbi.nlm.nih.gov/31961429

Background: In middle-income countries, the burden of colorectal cancer (CRC) is increasing in parallel with resources for diagnosis and treatment. There is a potential benefit of CRC screening programs in Mexico. Objective: Since there are no organized screening programs in the country, we explored the willingness of individuals to complete a faecal immunochemical testing (FIT) based CRC ...

Diagnostic accuracy of faecal immunochemical test for ...

https://pubmed.ncbi.nlm.nih.gov/23957462

Background: The role of a faecal immunochemical test (FIT) in screening individuals with a positive family history of colorectal cancer (CRC) is not clear. Aim: To assess the diagnostic accuracy of FIT using colonoscopy findings as the gold standard in identifying colorectal neoplasms. Methods: We analysed data from 4539 asymptomatic subjects aged 50-70 years who had both colonoscopy and FIT ...
