Apr 01, 2001 - An increase in local **dispersion of repolarization time (spatial autocorrelation)**, but not global **dispersion (standard deviation)**, was observed in optically recorded action potentials from guinea pig LV epicardium when the heart was made hypoxic or hypothermic .

Growing evidence suggests that myocardial ischemia alters **spatial** and **temporal** indices of **ventricular repolarization dispersion (VRD)**. 8 – 10 Findings from these studies demonstrate that indices of VRD are dynamic in response to sudden coronary artery occlusion and restoration of normal perfusion in human and animal experiments.
