## Cost-effectiveness analysis comparing lumen-apposing ...

[https://www.giejournal.org/article/S0016-5107\(18\)30256-6/fulltext](https://www.giejournal.org/article/S0016-5107(18)30256-6/fulltext)

EUS-guided transmural drainage is effective in the management of **pancreatic walled-off necrosis** (WON). A **lumen-apposing metal stent (LAMS)** has recently been developed specifically for the drainage of **pancreatic fluid** collections that shows promising results.

### Cost-effectiveness analysis comparing lumen-apposing ...

[https://www.giejournal.org/article/S0016-5107\(18\)30256-6/fulltext](https://www.giejournal.org/article/S0016-5107(18)30256-6/fulltext)

EUS-guided transmural drainage is effective in the management of pancreatic walled-off necrosis (WON). A lumen-apposing **metal stent** (LAMS) has recently been developed specifically for the drainage of pancreatic fluid collections that shows promising results. However, no cost-effectiveness data have been published in comparison with endoscopic drainage with traditional plastic **stents** (PSs).
