**1** Pyuria in patients with Kawasaki disease

Toru Watanabe

#### Abstract

Kawasaki disease (KD) is an acute, febrile vasculitis that predominantly develops in children  $\leq 5$  year of age and can lead to multiple organ injuries including the kidneys. Of these injuries, pyuria is a common feature of patients with KD, occurring in 30%-80% of patients. Sterile pyuria is most common in KD patients  $\leq 1$  year of age. KD patients with sterile pyuria exhibit more severe inflammatory reactions and may have sub-clinical renal injuries. Sterile pyuria in KD is associated with mononuclear

#### Match Overview

Match Number	Source	Words	Percentage
1	CrossCheck Toru Watanabe. "Sterile pyuria in patients with Kawasaki disease originates from both the urethra and the kidney"	162 words	5%
2	Internet crawled on 22-Sep-2010 lib.bioinfo.pl	124 words	4%
3	CrossCheck A. L. Nager. "Jaundice as an Early Diagnostic Sign of Urinary Tract Infection in Infancy", PEDIATRICS, 05/01/2002	35 words	1%
4	CrossCheck Lee, K.Y. "Kawasaki disease may be a hyperimmune reaction of genetically susceptible children to variants of n"	31 words	1%
5	CrossCheck Ferrin, L. "Comparative study of complete versus incomplete Kawasaki disease in 59 pediatric patients", Joint B	30 words	1%
6	CrossCheck Maria Cristina Diana. "Sudden Death in an Infant Revealing Atypical Kawasaki Disease", Pediatric Emergency Ca	24 words	1%
7	CrossCheck K. Ohta. "Increased levels of urinary interleukin-6 in Kawasaki disease", European Journal of Pediatrics, 08/1993	19 words	1%
8	CrossCheck Sheno-Lina Jan. "Pyuria is not always sterile in children"	18 words	1%
